Consolidated Aggregates has served the swimming pool industry for 20+ years. Natural pebbles ensure our pools and spas complement your landscape design. Each bag of our swimming pool pebbles, colored quartz, and colored glass is screened, washed, and dried to ensure the highest quality product for swimming pool applications. All manufacturing of these products is completed at our processing plants in Arizona and Mississippi and shipped to our distributors throughout the United States, Mexico, and Canada.

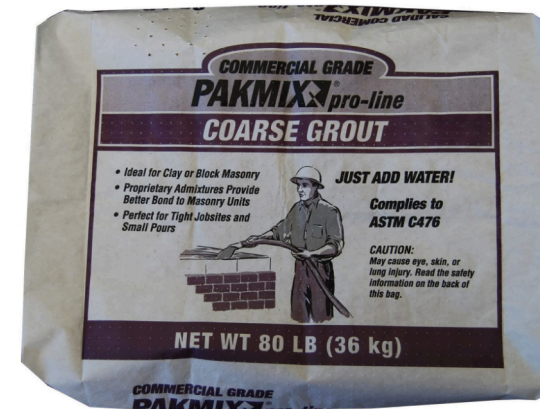

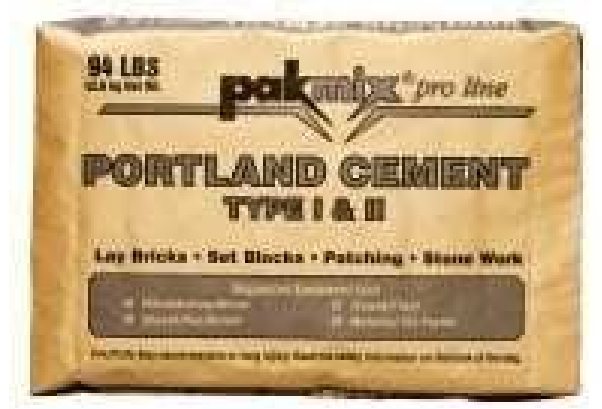

Concrete Mix

We manufacture multiple product lines, historically under the Stone Edge Surfaces brand, to meet the needs of professional contractors. All our products are made in the USA in our own facilities. These concrete overlays range from complete decorative systems to commercial self-leveling, patch and repair, and bond coat solutions. With our technical background in concrete overlays, we are confident we have the solution you are looking for.

Mist Gray	Linen	Palace Beige	Storm Gray	Dove Gray	Buff
Persimmon	Dogwood	Slate Green			
Dove Gray	Dark Gray	Dark Cypress			

Deck Seal

Please note that while we make every effort to ensure color accuracy in our marketing materials, the colors displayed may vary slightly due to differences in monitor settings, screen calibration, and printing processes. As a result, the final product may not match the exact color shown. We recommend reviewing physical samples, if available, before placing your order to ensure satisfaction with the final result.

Consolidated Aggregates works diligently to replicate the mortar color samples provided; however, due to varying lighting and normal printing limitations, these color samples might not accurately reflect the exact shade or hue of the mortar on your job. It is recommended you prepare an on-site sample using the same sand, masonry units, and construction practice that will be used on your project before finalizing the project's color selection.

We offer 12 colors of preblended Type S and Type N Masonry Mortars in either 80 lb. bags or 3000 lb. bulk bags. We take care of pre-blending the colored mortar at our manufacturing facility to ensure consistency of color throughout your project, so you don't have to hassle with on-site blending. We also have several mobile masonry silos that are available to use on your large commercial jobs.

100% Recycled Glass | UV Light Resistant | Scratch Resistant | Brilliant Long-lasting finish

Sizes: #0 & #1

Colors shown approximate the shade of color based on a 5 sack mix (3000 psi) using Grey Type 1 cement at a 4" slump. Variations can be expected due to differences in cement color, slump, aggregates, admixtures and method of application. We recommend that a test slab be poured and approved prior to the start of the job. Use this chart as a guideline only. Colors shown are representative of integral colored concrete sealed with a decorative concrete sealer product.

Consolidated Aggregates Integral Colors are packaged in pre-measured per cubic yard repulpable bags. Iron oxide pigments are used in ready mix, pre-cast, tilt-up, ornamental concrete, shotcrete, mortar, concrete masonry units, pavers, roof tiles, and retaining wall units. Additional uses are to color stucco, plaster, cast stone, and many other cement-based construction materials.

## About Us

In late 2003, after many years helping build a successful business with previous business partners, Laurence and Mark Turley came to a crossroad in life. They decided to bring a collection of experiences they had in business, mining, and aggregate supply and launch Turley International Resources. Their vision was to build the infrastructure that would support the product growth spanning multiple industries allowing the company to maintain the balance needed when mining their own materials. Their vision was also to help other strategic supply partners maintain that same supply balance. That vision is alive and well as seen in the growth of the business over the course of the last 20 years. Consolidated Aggregates is a division of Turley International Resources.

## FAQ's

How do I place my order with Consolidated Aggregates?

Please email a copy of your PO to [orderdesk@consolidatedagg.com](mailto:orderdesk@consolidatedagg.com). An order confirmation will be sent upon processing the order. Updates will be sent when the order is released to shipping department and then again when the shipping is scheduled.

How can I get technical data and specifications?

On our website, navigate to "Products" and you will find links to the TDS and SDS documents that we have available for certain items.

Do you offer custom toll blending?

Yes. We have the screening, drying, bagging, and palletizing infrastructure in place for some toll blending opportunities. Please contact your regional rep to discuss the viability as well as lead time and minimum order quantities needed to make this happen.
